Hazardous Bookings

1 CONTENTS

1	Introduction	3
1.1	Green Line Hazardous Containers	3
1.2	Red Line Hazardous Containers	3
1.3	Possible Error Messages	3

2 INTRODUCTION

If the Terminal has set up Hazardous bookings to be verified against the Port Authority list, all Hazardous container numbers must have been sent to the Port Authority prior to the booking so that they can be verified.

For a Hazardous booking to be successfully confirmed it must meet the following:

2.1 Green Line Hazardous Containers

- The container number must be in the Port Authority Hazardous list. VBS will always check the container number entered against this list.
- The commodity must be set to Hazardous;
- The earliest delivery date for the Hazardous container in use must have been specified by the Port Authority;
- The booking must be made after the earliest delivery date specified by the Port Authority.

2.2 Red Line Hazardous Containers

- The container number must be in the Port Authority Hazardous list. VBS will always check the container number entered against this list.
- The commodity must be set to Hazardous
- If no delivery date has been specified by the Port Authority, the slot booking must be created by the CTO Terminal user so you must contact the terminal to arrange a slot.

2.3 Possible Error Messages

Following are the possible error messages that may occur when confirming a HAZ booking in VBS:-

Haz container booking is before the Port Authority Deliver After DateTime...

Unable to confirm the slot because the container number is listed as HAZ by the Port Authority and cannot be dropped off at the terminal before 26 OCT 2011 - Zone 1

Haz Container is listed in the Port Authority list as a Green Line Haz but no Deliver After date/time was set by the Port Authority. This error should be quite rare for Green Line HAZ.

This Container is listed as GREEN Line Hazardous by the Port Authority but the delivery time is missing. Contact the Port Authority to arrange a delivery time.

Red Line Haz containers may not have a Deliver After date/time (not mandatory for Red Line) and it can be confirmed if the Slot was created by a CTO and the carrier acknowledges that they have contacted the Facility regarding the delivery time.

This Container is listed as a RED Line Hazardous by the Port Authority and you must contact the Facility to arrange delivery. If you acknowledge that you have contacted the facility (Stevedore) to arrange delivery please click "Save" button again to confirm the slot.

An error can occur if the Haz container is not in the Port Authority list. This would occur because the Port Authority has not been informed about the container. Once the Port Authority has been in informed it can take an hour for the data to be transferred to VBS.

Unable to confirm the slot because the Hazardous container number APZU3659582 is not listed as HAZ by the Port Authority. Inform the Port Authority first then try again 1 hour later.

Red Line Haz containers may not have a Deliver After date/time (not mandatory for Red Line) and it can be confirmed if the Slot was created by a CTO and the carrier acknowledges that they have contacted the Facility regarding the delivery time. In this case the slot was not created by CTO so it cannot be confirmed. Contact the Terminal to arrange a slot for delivery.

This Container is listed as a RED Line Hazardous and the booking must be a Facility created slot.

Haz container is checked against the Port Authority list even though the carrier has a GENERAL commodity code. Check that the container is a HAZ container and if so change the commodity code to HAZ.

Unable to confirm the slot because the container number is listed as HAZ by the Port Authority. Therefore the commodity must be HAZARDOUS to confirm the slot
