1-STOP CONNECTS THE SUPPLY CHAIN WITH REAL-TIME CONNECTIVITY.

1-Stop Connections (1-Stop) is another step closer in their vision, to build a smarter supply chain, with their latest innovation – ‘**1-Stop Deliver**’. 1-Stop Deliver will improve key interactions between the Driver, their Employer, and the Empty Park. This way the driver can focus on their task at hand – driving.

1-Stop Deliver is a mobile based app, which will assist the truck driver in their key daily functions. The app will integrate with Empty Park Gate operations so that the driver can reduce paperwork with greater efficiencies to be seen at the Empty Container Park.

1-Stop Deliver provides many benefits to Transport Operators, and in turn, the whole supply chain. These include:

- Real-Time communication of timeslot details and instructions
- Automated Gate Processing at participating Empty Container Parks
- Improved Truck Turn Times, reducing costs incurred by the transport community
- Eliminate unnecessary paperwork, text messages and radio communication
- Increased visibility and communication between the Empty Park and the Driver

Michael Bouari, CEO of 1-Stop Connections adds “Our latest innovation is only the start of our platform future, here at 1-Stop we are continually pushing the boundaries to provide the industry with the latest technology and smart solutions to get your cargo faster. By creating a platform for all supply chain parties, 1-Stop can continue the journey of creating a connected supply chain by using data to help drive visibility, productivity, and better decisions. We plan to continue this journey of enabling stakeholders to collaborate better and use our solutions to assist them in making smarter decisions.”

Further information will be released in coming weeks on how the transport community can access 1-Stop Deliver.
